S M A L L D O M E S T I C A P P L I A N C E S

Founded in 1948 by Vittorio Bertazzoni in Guastalla Italy, 70 plus years later SMEG is still family-owned and operated. Internationally recognized for the production of Italian-designed appliances born from the collaboration with world-famous architects; refined products that combine performance and style, intended for consumers who are attentive to design and its evolutions.

At the base of the SMEG philosophy there are two fundamental principles:

1. Technology with style. The most advanced technologies are hidden behind a distinctive aesthetic emblem of Italian design.
2. Not just products, creations. Products born from the collaboration with internationally renowned architects who combine technology with beauty in the making, designed to last over time.

SMEG USA's manufacturer's warranty included with all small appliances and housewares is good for one year from the date of purchase, and is only valid for appliances purchased within, and used exclusively within, the United States and Canada.
